Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:

Click on sort button up on the right corner of the home page

Expected Behavior:

The filter is open with the following items:
- Name (A to Z)
- Name (Z to A)
- Price (from low to high)
- Price (from high to low)

4.1.2 Sort by name from A to Z

Preconditions:

- The user is logged in with valid credentials.
- The user is on the home page.
- The Sort filter is open correctly

Data:

Username: `locked_out_user`
Password: `secret_sauce`

Steps:

Click on Name (A to Z)

Expected Behavior:

All the items in the home should be ordered by Name from A to Z

4.1.3 Sort by name from Z to A

Preconditions:

- The user is logged in with valid credentials.
- The user is on the home page.
- The Sort filter is open correctly

Data:

Username: `locked_out_user`
Password: `secret_sauce`

Steps:

Click on Name (Z to A)

Expected Behavior:

All the items in the home should be ordered by Name from Z to A

4.1.4 Sort by Price from low to high

Preconditions:

- The user is logged in with valid credentials.
- The user is on the home page.
- The Sort filter is open correctly

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on Price (low to high)

Expected Behavior:

All the items in the home should be ordered by price from low to high

4.1.5 Sort by Price from high to low

Preconditions:

- The user is logged in with valid credentials.
- The user is on the home page.
- The Sort filter is open correctly

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on Price (low to high)

Expected Behavior:

All the items in the home should be ordered by price from high to low

5. Test Plan – Product Details

Each product has a detail page where the user can find this information:

- Imagine of the product
- Title of the product
- Description
- Price
- Add to cart/Remove button

5.1 Test Cases

5.1.1 Product details page

Preconditions:

- The user is logged in with valid credentials.
- The user is on the home page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on product name

Expected Behavior:

The user should be redirect on the product details page which has the following information:

- Imagine of the product
- Title of the product
- Description
- Price
- Add to cart/Remove button

5.1.2 Add to cart button

Preconditions:

- The user is logged in with valid credentials.

- The user is product detail page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on Add to cart button

Expected Behavior:

- The button becomes red and the label should be *Remove*
- A red round badge is added on cart link with the number of the item added (*n*)

5.1.3 Remove button

Preconditions:
The user is logged in with valid credentials
The user is product detail page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on *Remove* button

Expected Behavior:

- The button becomes black and the label should change in *Add to cart*
- With only 1 item in the cart, the red round badge shouldn't be present anymore on cart link
  If the items in the cart were *n*, the badge label should become *n-1*

5.1.4 Back to products button

Preconditions:
The user is logged in with valid credentials
The user is product detail page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on *Back to products* button

Expected Behavior:

The user will be redirect on products page

6. Test Plan – Cart page

In the cart page the user can see the items added on his/her cart with the following details:

- Quantity
- Price
- Title and description

 The user can also perform these actions
- Remove an item
- Continue to shopping
- Checkout

6.1   Test cases

6.1.1 Product details page

Preconditions:

- The user is logged in with valid credentials.
- The user added items in the cart

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on chopping cart link

Expected Behavior:
The user should be redirect on cart page

6.1.2 Check details

Preconditions:

- The user is logged in with valid credentials.
- The added items in the cart
- The user is on cart page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
- Check if the title, the description, the price, the quantity and the imagine are correct
- Check if Continue Shopping button is present
- Check if Checkout button is present
- Check if Remove button is present

Expected Behavior:

The user should be redirect on cart page

6.1.3 Continue Shopping link

Preconditions:

- The user is logged in with valid credentials.
- The added items in the cart
- The user is on cart page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on *Continue Shopping* Button

Expected Behavior:

The user should be redirect on products page

6.1.4 Checkout page link

Preconditions:

- The user is logged in with valid credentials.
- The added items in the cart
- The user is on cart page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on *Checkout* Button

Expected Behavior:

The user should be redirect on Checkout page

6.1.5 Remove button

Preconditions:
- The user is logged in with valid credentials.
- The added items in the cart
- The user is on cart page

Data:
Username: `locked_out_user`
Password: `secret_sauce`

Steps:
Click on *Remove* button

Expected Behavior:

- The item should be removed from cart
- The badge label should become *n-1*

7. Test Plan – Checkout page

The checkout page is divided in two steps:
